24 products | General varieties & buying guidance

Product descriptions are general buying guidance. Varieties, origin, availability, quality limits, packaging, quantity, price and delivery terms are confirmed in the quotation and contract. AI-generated images are illustrative and do not represent a specific shipment.

Product range

Coconut

VARIETIES & FORMS

Tall types for mature kernels; dwarf types for tender-nut enquiries; named tall–dwarf hybrids.

BUYING SPECIFICATIONS & USES

Agree maturity, husked form, nut weight and kernel condition. Used for fresh coconut water, culinary kernel and processing.

Agree maturity, ventilation and temperature for the product and journey. Protect from bruising and confirm the required cold chain.

Guava

VARIETIES & FORMS

White-flesh types; pink or red-flesh types; named cultivars such as Beaumont. Seed content varies.

BUYING SPECIFICATIONS & USES

Specify flesh colour, firmness, fruit weight and ripeness. Suitable for fresh eating, juice, purée and preserves.

Agree maturity, ventilation and temperature for the product and journey. Protect from bruising and confirm the required cold chain.

Product range

Dragon Fruit

VARIETIES & FORMS

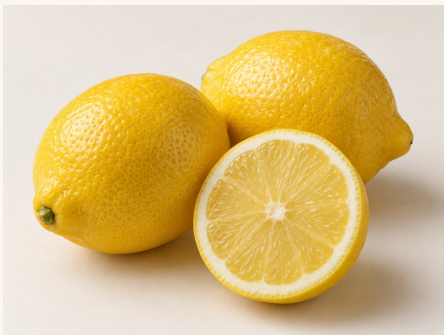

Red skin with white flesh; red skin with red or purple flesh; yellow skin with white flesh.

BUYING SPECIFICATIONS & USES

Agree fruit weight, flesh colour, maturity, sweetness and skin condition. Used fresh, in beverages and desserts.

Agree maturity, ventilation and temperature for the product and journey. Protect from bruising and confirm the required cold chain.

Lemon & Seedless Lime

VARIETIES & FORMS

Eureka and Lisbon lemons; Meyer citrus hybrid; Persian / Tahiti lime, a separate citrus type that is normally seedless.

BUYING SPECIFICATIONS & USES

Agree size, skin colour, juice content and seed tolerance. Handling differs between lemons and limes; used in food and beverages.

Agree maturity, ventilation and temperature for the product and journey. Protect from bruising and confirm the required cold chain.

Product range

Bananas

VARIETIES & FORMS

Cavendish dessert-banana group; smaller Lady Finger / Pome types; red-skinned bananas. Image: green Cavendish.

BUYING SPECIFICATIONS & USES

Specify finger size, green or ripened delivery stage, crown condition and carton weight for wholesale or retail.

Agree maturity, ventilation and temperature for the product and journey. Protect from bruising and confirm the required cold chain.

Podisu Shallot Onion

VARIETIES & FORMS

Small Indian multiplier shallots, also called sambar onions. Named selections include CO types and MDU 1.

BUYING SPECIFICATIONS & USES

Agree bulb diameter, cured condition, colour, cluster separation and sprouting limits. Used in curries, sauces and pickles.

Keep dry and protected from moisture, pests and contamination. Agree ventilation and storage conditions for the supplied form.

Product range

Nasik Onion

VARIETIES & FORMS

Dark-red and light-red selections, graded by size. Nasik / Nashik is a regional trade name; confirm cultivar separately.

BUYING SPECIFICATIONS & USES

Specify diameter, firmness, dry necks, skin retention and sprouting limits. Suitable for fresh trade and cooking.

Keep dry and protected from moisture, pests and contamination. Agree ventilation and storage conditions for the supplied form.

Bangalore Rose Onions

VARIETIES & FORMS

A named small rose-onion type. Whole cured bulbs can be selected into smaller and larger grades.

BUYING SPECIFICATIONS & USES

Confirm type, origin, diameter, firmness and dry skin. Used for cooking, pickling and specialty produce markets.

Keep dry and protected from moisture, pests and contamination. Agree ventilation and storage conditions for the supplied form.

Product range

Bellary Onion

VARIETIES & FORMS

Red bulb types in medium and large grades. Bellary is a regional / trade description rather than a complete cultivar specification.

BUYING SPECIFICATIONS & USES

Agree cultivar, size, colour, curing and damage limits for wholesale, foodservice or processing.

Keep dry and protected from moisture, pests and contamination. Agree ventilation and storage conditions for the supplied form.

Ginger

VARIETIES & FORMS

Varada: plump fingers. Mahima: extra-bold rhizomes. Rejatha: bold rhizomes. Fresh, dried, sliced or powdered forms.

BUYING SPECIFICATIONS & USES

Specify form, maturity, finger size, fibre preference and dried-product moisture. Used in cooking, drinks and spice processing.

Agree maturity, ventilation and temperature for the product and journey. Protect from bruising and confirm the required cold chain.

Product range

Garlic

VARIETIES & FORMS

White-bulb selections including Yamuna Safed types. Whole cured bulbs, large-bulb grades or peeled cloves.

BUYING SPECIFICATIONS & USES

Agree diameter, clove uniformity, dryness and sprouting limits. Peeled garlic requires separate storage; used in cooking and seasoning.

Keep dry and protected from moisture, pests and contamination. Agree ventilation and storage conditions for the supplied form.

Red Dry Chillies

VARIETIES & FORMS

Byadagi Kaddi: colour-focused and milder. Guntur Sannam: pungent. Bird's Eye: small and hot. Heat varies by crop.

BUYING SPECIFICATIONS & USES

Specify stem-on or stemless, whole or crushed, heat, colour and moisture. Used in sauces, blends and seasonings.

Keep dry and protected from moisture, pests and contamination. Agree ventilation and storage conditions for the supplied form.

Product range

Cumin Seeds

VARIETIES & FORMS

Named cultivars include GC 1 and RZ 19. Cleaned and colour-sorted grades describe processing rather than botanical varieties.

BUYING SPECIFICATIONS & USES

Agree purity, moisture, aroma and foreign matter. Used whole or ground in savoury dishes and spice blends.

Keep dry and protected from moisture, pests and contamination. Agree ventilation and storage conditions for the supplied form.

Fennel Seeds

VARIETIES & FORMS

CO 1, Gujarat Fennel 1, PF 35 and UF 32 are named selections. Trade grades may focus on bold size or green colour.

BUYING SPECIFICATIONS & USES

Specify seed size, colour, aroma, purity and moisture for cooking, bakery, confectionery or infusions.

Keep dry and protected from moisture, pests and contamination. Agree ventilation and storage conditions for the supplied form.

Product range

Sesame Seeds

VARIETIES & FORMS

Natural white, black or brown seeds; hulled seeds; raw or toasted forms. Hulling is a processing step.

BUYING SPECIFICATIONS & USES

Agree colour, purity, moisture and residual hulls for bakery, pastes or food use. Sesame is an allergen.

Keep dry and protected from moisture, pests and contamination. Agree ventilation and storage conditions for the supplied form.

Turmeric Finger

VARIETIES & FORMS

Erode local: shorter curved fingers. Salem: larger, longer fingers. Prathibha: a named selection. Polished or unpolished forms.

BUYING SPECIFICATIONS & USES

Agree colour, moisture, finger size, broken pieces and required curcumin testing. Used for grinding and spice processing.

Keep dry and protected from moisture, pests and contamination. Agree ventilation and storage conditions for the supplied form.

Product range

Tamarind

VARIETIES & FORMS

Sour types for cooking; sweet types for snacking; whole pods, seeded or seedless pulp and paste.

BUYING SPECIFICATIONS & USES

Specify sweetness or acidity, seed and fibre content, pulp colour and moisture. Used in sauces, drinks and confectionery.

Keep dry and protected from moisture, pests and contamination. Agree ventilation and storage conditions for the supplied form.

Groundnut (Peanuts)

VARIETIES & FORMS

Runner: uniform kernels. Virginia: larger kernels. Spanish: smaller reddish-skinned kernels. Valencia: often several kernels per pod.

BUYING SPECIFICATIONS & USES

Agree in-shell or kernel form, count basis, moisture and food-safety tests. Used for snacks and ingredients. Peanut allergen applies.

Keep dry and protected from moisture, pests and contamination. Agree ventilation and storage conditions for the supplied form.

Product range

Rapeseed Meal

VARIETIES & FORMS

Solvent-extracted meal; mechanically pressed expeller cake; canola-quality meal. Composition depends on the process.

BUYING SPECIFICATIONS & USES

Agree protein, moisture, fibre, residual oil, glucosinolates and analytical basis. A feed ingredient; confirm suitability with the feed formulator.

Keep dry and protected from moisture, pests and contamination. Agree ventilation and storage conditions for the supplied form.

Blanched Peanuts

VARIETIES & FORMS

Whole kernels, split kernels and sized pieces. Blanching removes skins; confirm the original peanut type separately.

BUYING SPECIFICATIONS & USES

Specify size, residual skin, raw or roasted status and testing.

Blanching alone does not mean ready-to-eat. Peanuts are an allergen.

Keep dry and protected from moisture, pests and contamination. Agree ventilation and storage conditions for the supplied form.

Product range

Chickpeas (Kabuli & Desi)

VARIETIES & FORMS

Kabuli: larger, lighter seeds. Desi: smaller, darker, more angular seeds. Split, dehulled Desi is a processed form.

BUYING SPECIFICATIONS & USES

Agree grain size, colour, moisture, purity and damage limits. Used for curries, hummus, flour and pulse processing.

Keep dry and protected from moisture, pests and contamination. Agree ventilation and storage conditions for the supplied form.

Green Moong Beans

VARIETIES & FORMS

Named cultivars include Jade-AU and Crystal. Whole green beans, split skin-on beans and dehulled yellow beans.

BUYING SPECIFICATIONS & USES

Specify size, moisture, purity and damage. Sprouting needs separate germination and food-safety checks; also used in cooked dishes and flour.

Keep dry and protected from moisture, pests and contamination. Agree ventilation and storage conditions for the supplied form.

Product range

Maize (Corn)

VARIETIES & FORMS

Dent: field corn. Flint: harder kernels. Popcorn: selected for expansion. Sweet corn: fresh or processed vegetable.

BUYING SPECIFICATIONS & USES

For dry grain, agree moisture, colour, test weight and impurities. Food, feed and industrial grades differ; sweet corn needs separate handling.

Keep dry and protected from moisture, pests and contamination. Agree ventilation and storage conditions for the supplied form.

Chia Seeds

VARIETIES & FORMS

Black chia: mixed dark mottled seeds. White chia: selected light seeds. Whole and milled forms are distinct.

BUYING SPECIFICATIONS & USES

Agree colour, purity, moisture and cleaning. Milled chia also needs a particle-size specification. Used in bakery, cereals and beverages.

Keep dry and protected from moisture, pests and contamination. Agree ventilation and storage conditions for the supplied form.
